

Dear Ms. Hall,

At the Los Angeles County Science Fair, the Los Angeles Section of NACE recognized my science project, "The Effects of Water Temperature on Electrolysis", with an invitation to both the regional meets and the Southern California convention and a \$50 award. Thank you so much for acknowledging my project and awarding me this monetary prize.

I did not know there was an association of corrosion engineers. It is very nice of you to recognize students for their science work. It was my first time participating in this science fair although I have participated in science fairs at school.

Thank you for your invitation to your annual conference and dinner also. It sounds interesting but it is a school day and night so I can not make it.

Thank you again for this honor. It will be a memory I will keep with me for many years and I am very proud to have been recognized. Who knows, maybe engineering in corrosion prevention will be in my future. Both my Dad and one grandfather have degrees in engineering. (I have an advanced degree in Legos.)

Sincerely,

Josh Lappen
